

THORNLIE PRIMARY SCHOOL

LEARNING AT HOME (REMOTE LEARNING)

Dear Parents and Carers,

In 2020 during the COVID 19 lockdown, staff at Thornlie Primary School were able to quickly plan and implement Learning at Home (Remote Learning) programs for students. Since then, staff have further developed plans to implement learning at home programs for students in the event the whole school is closed or one or more classrooms are closed.

If there is a whole school closure, then it is likely that all staff will not be onsite at the school. If one or more classrooms are closed, then some staff and some students may be on site at the school and will be able to resume the usual teaching and learning program for some students.

The *Thornlie Primary School's Response Plan to Learning at Home* and *Thornlie Primary School's Plan for Continuity of Learning at Home* provide information for parents and carers in relation to both these scenarios to ensure continuity of learning for students.

For additional information about learning at home during a partial or full school closure, please access the Thornlie Primary School Website and read the information in the **Response to Learning at Home** tab and also the **Learning at Home** tab which will contain learning resources provided by classroom teachers when a whole or partial school closure is announced.

We hope these plans will not have to be implemented, however in the event there is a partial or whole school closure, it is important that parents and carers know that our school has planned and is ready for **Learning at Home**.

Regards

Lynette Deane-Spread
Principal
